

CLOUDFLARE™

Training for CloudFlare's Certified Hosting Providers

Part II: Benefits of being a CloudFlare Certified Partner

*Understand what it means to be a CloudFlare Partner
and the benefits*

Benefits to You As a Certified Partner

When your customers sign up for CloudFlare, you get:

- Reduced server load
- Bandwidth savings
- Fewer support tickets
- More performance out of existing infrastructure
- A broad security layer and DDoS protection
- An IPv4/v6 gateway

CloudFlare provides you:

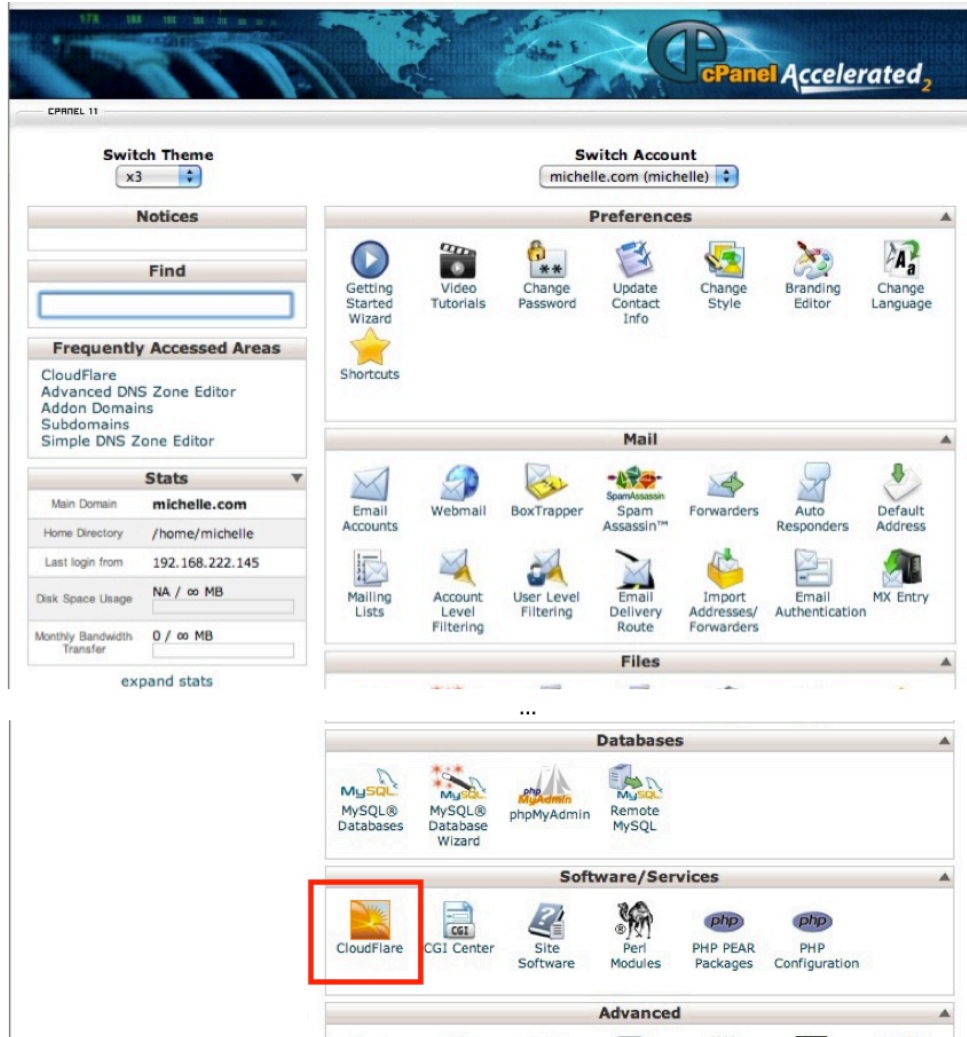

- Weekly analytics
- Training and communication tools

Benefits to Your Customers

- Sites load twice as fast
- Use 60% less bandwidth
- See 65% fewer requests
- Have an additional layer of web protection

How Does the Partnership Work?

- CloudFlare is integrated into your control panel
- It is one-click easy for your customers to enable the service

For a detailed installation guide, go to [More Training Resources](#) link.

Once CloudFlare is Enabled via a Certified Partner

What stays the same	What changes
Hosting Provider	CNAME
Registrar	IP is modified
Authoritative DNS	

- Enabling CloudFlare is a simple CNAME change
- The name servers do not change (different from a website signing up directly on www.cloudflare.com)
- CloudFlare ***only works*** on CNAME
